7. NOVEDADES

● SUMARIO

- [World Tuberculosis Day: Time to Translate New Clinical Findings in Pediatric Tuberculosis in Routine Practice.](#) *Pediatr Infect Dis J.* 2023 Aug 1;42(8):633-636.

● TRATAMIENTO

- [Shorter Treatment for Nonsevere Tuberculosis in African and Indian Children.](#) *N Engl J Med.* 2022;386:911---22-.
- [Development of treatment-decision algorithms for children evaluated for pulmonary tuberculosis: an individual participant data meta-analysis.](#) *Lancet Child Adolesc Health.* 2023 May;7(5):336-346.

● DIAGNÓSTICO

- [What's New in the Molecular Diagnosis of Childhood Tuberculosis?](#) *Pediatr Infect Dis J.* 2023 Oct 1;42(10):e377-e379.
- [Optimization of the Simple One-Step Stool Processing Method to Diagnose Tuberculosis: Evaluation of Robustness and Stool Transport Conditions for Global Implementation.](#) *Microbiol Spectr.* 2023 Aug 17;11(4):e0117123.
- [Comparison of gastric lavage/sputum and stool specimens in the diagnosis of pediatric pulmonary tuberculosis- A pilot study.](#) *Indian J Tuberc.* 2023 Oct;70(4):445-450.
- [Utility and Limits of Lung Ultrasound in Childhood Pulmonary Tuberculosis: Lessons from a Case Series and Literature Review.](#) *J. Clin. Med.* 2022, 11, 5714.

8. PERSPECTIVAS FUTURAS

- [Progresos, prioridades y oportunidades de financiación](#) *Pathogens.* 2022 Jan 21;11(2):128.

Table 4

Key short-term pediatric TB research gaps.

Research Area	Research Gap(s)
TB preventive treatment	Tests to distinguish TB infection from TB disease, e.g., blood-based RNA tests, blood-based immune response tests, CAD and portable X-ray technologies Tests to predict risk of progression from TB infection to TB disease, e.g., blood-based host response tests Ultrashort child friendly TPT regimens for child contacts of people with drug-susceptible and drug-resistant TB
TB vaccines	Pediatric investigations of TB vaccine candidate M72/AS01E
TB diagnostics	Non-invasive, non-sputum, point-of-care diagnostic tests, e.g., oral swab-based rapid molecular tests for TB detection, next generation LAM tests, etc.
TB treatment	Pediatric investigation of high dose rifapentine Pediatric investigation of pretomanid (multi-dose) Non-sputum tests to facilitate treatment monitoring and shortening, e.g., blood-based host response tests
